If you would like to carry your Mars 200 with belt clip to the green, please watch out for below images!

- 1 Insert Mars 200 into the belt clip from top to bottom till hearing “ka”, and clip it to your belt.
- 2 If you would like to take off Mars 200 from belt clip. Please rotate Mars 200 to be vertical with the belt clip, and use thumb and forefinger to push the belt clip.
- 3 And you can take off Mars 200 from the belt clip easily.

The device with belt clip screw in product goods, if you don't need that, there provide a “—” type screw for battery case, you can replace that as below images. Replace belt chip will allow you carry the device more easy.

# Charge and Battery

You can use AC plug or USB and computer for charging. Charging requires about 4 to 5 hours.

A rechargeable lithium battery is built in the body of Mars 200. For a long time not use the device, the battery maybe damage, and you can contact your distributor to buy a new battery and replace it. If you would like to replace the battery, please follow the steps as below:

## Step1.

Please use “+” type screw driver to gently remove the belt clip screw of battery case in the back of device. Or use a coin to replace “—” type screw. And use the sharp object of screw driver to pry the battery case.

## Step2.

Please pull out the damage battery. Insert the new battery connection and put in the new battery.

## Step3.

Please insert the battery case such as the direction of arrow. And turn on the device with pressing Power key for 3 sec.
